DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-10**, drawn to the curtain, classified in class 160, subclass 370.22.
- II. Claims **11-13**, drawn to the winding device, classified in class 242, subclass 414.1.
- III. Claims **14-17**, drawn to control circuit, classified in class 340, subclass 942.

The *inventions are distinct*, each from the other because of the following reasons:

Inventions in claims 1-10 and 11-13 and 14-17 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the winding device (of claims 11-13) and the control circuit (of claims 14-17) are distinct and separate inventions from the car curtain (of claims 1-10).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
